SUMMARY

Developer specializing in front end development. Experienced with all stages of the development cycle for dynamic web projects. Versed in numerous programming languages including JavaScript, Python, HTML, SQL, PHP and CSS. My experience as junior software developer enhanced my abilities in designing, implementing, testing, and creating enterprise grade software and I look forward to extending my ability into a standard developer role.

HIGHLIGHTS

- *Creative design*
- *Team oriented*
- *Service-focused*
- *Complex problem solver*
- *Excellent communicator*
- *Innovative*

EXPERIENCE

May 2016 to Current
Apex Systems Inc. - Raleigh, NC
Jr. Developer

- Work with senior developer to manage large, complex design projects for corporate clients.
- Attend daily standups and agile planning meetings to ensure that all aspects of the project are understood and that all road blocks are known to the product owners.
- Develop project concepts using industry tools and maintain optimal workflow and deliverables.
- Complete detailed programming and development tasks for front end public and internal websites as well as back-end server code
- Collaborate with designers to create clean interfaces and simple, intuitive interactions and experiences.
- Carry out quality assurance tests using Selenium to discover errors and optimize usability.
- Develop, test and deploy code in a four-week sprint cycle to ensure that the business needs are met fully and on time.
- Work in a team environment with both remote and local members utilizing source code GIT Workflows.

March 2015 to May 2016
Thomas Built Bus - High Point, NC
Assembly Technician

- Obtained the knowledge to use hand or power tools with care.
- Gained the ability to use computers to enter, access or retrieve data
- Followed company policies and ensure proper compliance.
- Maintained clean and orderly work area for proper safety.
